

Testimony of the Nursing Community Coalition

Prepared for the U.S. House Appropriations Subcommittee on Labor, Health and Human

Services, and Education, and Related Agencies

U.S. Department of Health and Human Services

Health Resources and Services Administration (HRSA) &

National Institutes of Health (NIH)

May 6, 2021

Submitted by Rachel Stevenson, Executive Director of the Nursing Community Coalition

As the nation continues to address COVID-19, we recognize how crucial federal investments for the nursing workforce and the nursing pipeline are to our patients and the health of our nation.

Given these realities, the Nursing Community Coalition (NCC) respectfully requests that

Congress continues robust and bold investment in nursing workforce, education, and research in

Fiscal Year (FY) 2022 by supporting **at least \$530 million for the Nursing Workforce**

Development programs (authorized under Title VIII of the *Public Health Service Act* [42

U.S.C. 296 et seq.] and administered by HRSA), a doubling of Title VIII funding, and **at least**

\$193 million for the National Institute of Nursing Research (NINR), one of the 27 Institutes

and Centers within NIH.

The Nursing Community Coalition is comprised of 63 national nursing organizations who work together to advance health care issues that impact education, research, practice, and regulation.

Collectively, the NCC represents Registered Nurses (RNs), Advanced Practice Registered

Nurses (APRNs),¹ nurse leaders, students, faculty, and researchers, as well as other nurses with advanced degrees. With more than four million nurses throughout the country, the NCC is committed to advancing the health of our nation through the nursing lens.² The nursing workforce is involved at every point of care, which is exemplified by nurses' heroic work during the COVID-19 pandemic. Together, we reiterate the bold request for increased funding for Title VIII Nursing Workforce Development programs and NINR, especially during these unprecedented times.

Providing Care to All Americans Through the Nursing Lens

As we continue to confront today's health care challenges and plan for tomorrow, increased federal resources for our nation's current and future nurses are even more imperative. Title VIII programs are instrumental in bolstering and sustaining the nation's diverse nursing pipeline by addressing all aspects of nursing workforce demand. In fact, the Bureau of Labor Statistics projected that by 2029 demand for RNs would increase 7%, illustrating an employment change of 221,900 nurses.³ Further, the demand for most APRNs is expected to grow by 45%.⁴ This is just one example on why continued and elevated investments in Title VIII Nursing Workforce Development Programs in FY 2022 is essential and will help nurses and nursing students have the resources to tackle our nation's health care needs, remain on the frontlines of the COVID-19 pandemic, assist with the distribution and administration of the vaccine, and be prepared for the public health challenges of the future.

¹ APRNs include certified nurse-midwives (CNMs), certified registered nurse anesthetists (CRNAs), clinical nurse specialists (CNSs) and nurse practitioners (NPs).

Funding for Title VIII is essential, but especially crucial during public health emergencies as these programs connect patients with high-quality nursing care in community health centers, hospitals, long-term care facilities, local and state health departments, schools, workplaces, and patients' homes. A prime example of this is the Title VIII Advanced Nursing Education (ANE) programs. ANE programs support APRN students and nurses to practice on the frontlines and in rural and underserved areas throughout the country. In Academic Year 2018-2019, ANE programs supported more than 9,000 students.⁵ Of these students, 73 percent of Advanced Nursing Education Workforce (ANEW) and 62 percent of Advance Nursing Education program had clinical training sites in primary care settings, while 78 percent of Nurse Anesthetist Trainee (NAT) recipients were trained in medically-underserved areas.⁶

Together, Title VIII Nursing Workforce Development programs serve a vital need and help to ensure that we have a robust nursing workforce that is prepared to respond to public health threats and ensure the health and safety of all Americans. **The Nursing Community Coalition respectfully requests at least \$530 million for the Title VIII Nursing Workforce Development programs in FY 2022.**

Improving Patient Care Through Scientific Research and Innovation:

For more than thirty years, scientific endeavors funded at the National Institute of Nursing Research (NINR) have been essential to advancing the health of individuals, families, and communities. Rigorous inquiry and research are indispensable when responding to the ever-changing healthcare landscape and healthcare emergencies, such as COVID-19. From precision

genomics to palliative care and wellness research to patient self-management, NINR has been at the forefront of evidence driven research to improve care.⁷ It is imperative that we continue to support this necessary scientific research, which is why the **Nursing Community Coalition respectfully requests at least \$193 million for the NINR in FY 2022.**

Now, more than ever, it is vital that we have the resources to meet today's public health challenges, such as COVID-19. Investing in Title VIII Nursing Workforce Development programs and NINR are essential to meeting that need. By providing bold funding for Title VIII and NINR, Congress can continue to reinforce and strengthen the foundational care nurses provide daily in communities across the country. Thank you for your support of these crucial programs.
